

مناقصة رقم (MEHE/KFW /149/2018) شراء وتوريد أثاث للمحافظات الشمالية و الجنوبية
لصالح وزارة التربية والتعليم العالي /منحة KFW

الأقل تكلفة والمستجيب جوهريا للشروط والمواصفات

سبب الإحالة

البنود المحالة على شركة المجمع الصناعي الحديث

LOT No.1 (West Bank)

No	Item	Specifications	Unit	Quantity	Unit price (Euro)	Total Prices (Euro)
1	Office chair <u>See illustration 1 (p: 118)</u>	<p>Technical Specifications</p> <p>1. Metal framework A swivel chair with 5 rolling wheels. The chair shall have a jack for elevation adjustment. The arms shall be made of iron and covered with reinforced plastic pieces from top. The base shall be made of black reinforced plastic. The seat shall be connected to the base by a chromium rod not less than 30 cm long and 5 cm in diameter.</p> <p>2. Chair back and seat It shall be made of plywood (sandwich) with a minimum thickness of 15 mm, best quality. The chair back and seat shall be upholstered using sponge. The thickness of sponge for the chair back should not be less than 8 cm and for the seat 10 cm. Special, good quality cloth shall be used for covering the chair back and seat. The color shall be chosen by the Ministry. The wooden seat shall be fixed on the metal base using bolts, with a nut fixed on the wooden seat. The chair shall be attached to the arms' framework using bolts and a nut fixed on the chair back. A device (propeller) shall be installed at the back of the chair to control the inclination process forwards and backwards.</p> <p>3. Marking of goods: The supplier shall put his commercial mark on all supplied pieces of goods by stamp or by fixing a sticker properly –approved by the Ministry- on the bottom face of the goods, this mark shall contain the supplier name, tender No. and the financial resource, in a clear and permanent manner and approved by Ministry.</p> <p>4. Packing: a-It should be backed unassembled using special cardboard for this type of furniture . b-The supplier shall assemble the furniture at his expenses and responsibility ,at the assigned places according to distribution table.</p>	No	117	88.5	10354.5

<p>3. <u>See illustration 3 (p: 118)</u></p>	<p>A. General In Classroom , and staff room use B. Technical Specifications Height: 46 cm Dimension of plastic seat: 42 x 43 cm Dimension of plastic back: 22 x 43 cm Plastic thickness: 5 - 8 mm Plastic color: grey . Diameter of iron profile: (20x20) mm Thickness of iron profile: 1.25mm Note: for plastic dimensions measured by cms (± 0.5) cm</p> <p>1. Metal framework The metal framework shall be made from profile. Diameter: (20x20) mm, thickness 1.25 mm. All ends of metal profile shall be closed with plastic covers. Plastic heels are to be installed at the bottom of the chair's legs. All metal frame work shall be welded together properly, strongly and in conformity with regulations. CO2 welding shall be used</p> <p>2. Chair back and seat -(Samples are available for bidders, to manufacture plastic parts with same chemical composition, same hardness, shape and thickness) -Chair back and seat shall be made out of reinforced plastic. Thickness: 5-8mm. -The chair back shall be fixed by metal screw; length 3.5cm, required number: 2. It shall be fixed from the backside. -The seat shall be fixed by metal screw; length: 3.5 cm required number: 2. -Strength for the plastic material of chair parts shall be according to international standards for this product . -High flexibility for shocks resistant according to international standards for this product. -Safe material for human touching that does not contain any mercury, lead, or any other harming materials. -Made of first class raw materials, non recycled, and free of any cancerous materials. -Resistant to direct sunlight for more than 4 years.</p> <p>3. Painting - All metal shall be painted after applying anticorrosive treatment with a least three stages and cleaned from oil, grease, dust, rust and other dirt using special thermal control painting for metal furniture to form a layer of base painting of (iron phosphate) (0.4 – 0.8) gm/m². - Automatic spray painting shall be applied to be followed by a drying process in a thermal furnace with suitable temperature and time for the process. - Thickness of painting (60 – 80) micron. - (A box polyester powder) paint should be used, color: Marengo No. 7016 Painting of iron, assembly, delivery and storage must be carried out away from climatic influence i.e. sun, dust etc.</p> <p>4. Marking of goods:</p>	<p>No</p>	<p>40</p>	<p>16</p>	<p>640</p>

MEHE/KFW /149/2018

رقم المناقصة:

		<p>a. The supplier shall put his commercial mark on all supplied pieces of goods by stamp or by fixing a sticker properly –approved by the Ministry- on the bottom face of the goods, this mark shall contain the name of the factory, tender No. and the financial resource, in a clear and permanent manner and approved by Ministry.</p> <p>b. Plastic parts of student and teacher chairs shall be marked thermally by sign (factory name) built in the template , approved by Ministry .</p> <p>5. Packing: The supplied goods shall be backed by using special plastic sheets (with air babbles) to prevent scratching of paintings and surfaces of goods .</p> <p>6. Inspections and tests: The MEHE has the right to test sample of this item at specialized labs or institutions at the Palestinian Authority area or nearby countries, at the supplier's expenses before and /or after bid award.</p>				
4	<p>Computer tables See illustration 4 (p: 118)</p>	<p>A. General For student use B. Technical Specifications 1. Metal Frame Work The metal frame shall be made from hollow metal profile tubes. Dimension: 20 x 20 mm and 40 x 20 mm, thickness: 1.25 mm. All metal pieces shall be welded together properly, strongly and in conformity with regulations. CO2 welding shall be used. Additional holes in the metal framework shall be made besides and equal in number to the original holes to enable future maintenance. All ends of the metal squares must be covered with black plastic covers. Plastic heels are to be installed under the legs to elevate the metal frame from the ground and must be fixed with galvanized metal screws. An Iron Box with a thickness of (1 mm) penetrated, pinned and fixed as shown on attached figure. 2. Table Board The table board shall be made of precut plywood (SANDWICH), best quality . Thickness of table board shall be 17 mm, dimensions: 110 x 54 cm. It shall be covered with colored plastic FORMICA on both sides.</p>	NO	109	68	7412

Top Formica thickness: 0.8mm. Color: grey(3130)
Bottom Formica thickness: 0.5mm .
The table board shall be belted using INJECTION POLYURETHANE THERMOSET.
The belt thickness must be(5- 8mm). Color: black
The table board shall be fixed on the metal framework using galvanized metal screws, (3.5 cm).
Number of screws: 12. It should be fixed from the bottom.
-Raw materials should be flexible.
-The polyethylene materials should not be used due to harmful material.
-The materials that will be used for manufacturing are similar to these used globally for manufacturing food containers, which means it is safe to be used .
-The used dyes and raw materials should be free of any cancerous materials.
-Strength for the disk top should be high "not less than 250 kg."
Keyboard Holder
Two-piece of sheet metal 1.5 mm thick shall be centrally welded to the upper frame of the table to hold the keyboard shelf.
One piece of sheet metal 1.5 mm thick and 96 cm long shall be welded at the front of the table.
In this piece, a hole 5 cm in diameter shall be made and covered with a hard plastic ring.
A shelf made of plywood with thickness of 17 mm, 57 x 40 cm covered with stretched laminating plastic sheet shall be installed to hold the keyboard.
This shelf shall be belted from front with wooden belt (U) shape. Color: black.
The shelf shall move on painted metal rails 1.25 mm thick and wheels.
3.Painting
-All metal shall be painted after applying anticorrosive treatment with at least three stages and cleaned from oil, grease, dust, rust and other dirt using special thermal control painting for metal furniture to form a layer of base painting of (iron phosphate) (0.4 – 0.8) gm/m².
-Automatic spray painting shall be applied to be followed by a drying process in a thermal furnace with suitable temperature and time for the process.
-Thickness of painting (60 – 80) micron.
-(Epoxy polyester powder) paint should be used, color: Marengo No. 7016
Painting of iron, assembly, delivery and storage must be carried out away from climatic influence i.e. sun, dust etc.
4.Marking of goods:
The supplier shall put his commercial mark on all supplied pieces of goods by stamp or by fixing a sticker properly –approved by the Ministry- on the bottom face of the goods, this mark shall contain the supplier name, tender No. and the financial resource, in a clear and permanent manner and approved by Ministry.
5.Packing:
The supplied goods shall be backed by using special plastic sheets (with air babbles) to prevent scratching of paintings and surfaces of goods.
6.Inspections and tests:

		The MEHE has the right to test sample of this item at specialized labs or institutions at the Palestinian Authority area or nearby countries, at the supplier's expenses before and /or after bid award . 6. Inspections and tests: The MEHE has the right to test sample of this item at specialized labs or institutions at the Palestinian Authority area or nearby countries, at the supplier's expenses before and /or after bid award.				
5	Stool chairs See illustration 5 (p: 119)	A. Technical Specifications .1 Chair Frame and Seat Height: 60 cm. Four-legged stool chair. The legs shall be made of metal profile pipe 22 mm in diameter and 1.25 mm thick as shown on attached figure. The chair shall have two rings made of metal profile pipes of 16 mm in diameter and 1.25 mm in thickness. All metal parts shall be welded using CO2 continuous welding. The seat shall have a disc-like shape, concave, diameter 34 cm made of Natural Sweden wood 34 mm thick, painted with lacquer paint. The seat shall be fixed to the metal framework by using galvanized metal screws, (3 cm). Number of screws: 4. Plastic heels are to be installed under the chair at the metal open ends. .2 Painting -All metal shall be painted after applying anticorrosive treatment with at least three stages and cleaned from oil, grease, dust, rust and other dirt using special thermal control painting for metal furniture to form a layer of base painting of (iron phosphate) (0.4 – 0.8) gm/m ² . -Automatic spray painting shall be followed by a drying process in a thermal furnace with suitable temperature and time for the process. -Thickness of painting (60 – 80) micron. -(Epoxy polyester powder) paint should be used, color: Marengo No. 7016 Painting of iron, assembly, delivery and storage must be carried out away from climatic influence i.e. sun, dust etc. .4 Marking of goods: a. The supplier shall put his commercial mark on all supplied pieces of goods by stamp or by fixing a sticker properly –approved by the Ministry- on the bottom face of the goods, this mark shall contain the supplier name, tender No. and the financial resource, in a clear and permanent manner and approved by Ministry. .5 Packing: The supplied goods shall be backed by using special plastic sheets (with air babbles) to prevent scratching of paintings and surfaces of goods . 6	<p>Teachers Desk</p> <p><u>See illustration 6 (p: 119)</u></p>	<p>A. General In staff room use</p> <p>B. Technical Specifications</p> <p>1. Metal framework The metal framework shall be made from hollow squared steel profile tubes 25 x 25mm and 1.25 mm thick. A drawer made of metal sheet 0.8mm thick shall be installed with lock and Chromium coated handle. Metal rails made of metal 1.25 mm thick with metal wheels on both sides for the drawer to slide on. A metal sheet cover 0.8 mm thick and width of 130 mm shall be installed around the level of the drawer. The bottom edges of the metal frame shall be covered with plastic heels. All metal pieces are to be welded together properly, strongly and in conformity with regulations. CO2 welding shall be used. Plastic heels are to be installed under the legs to elevate the iron parts from the ground.</p> <p>2. Table board The table board shall be made of "sandwich" wood, best quality. Thickness of plywood is 17 mm, dimensions: 100 x 60 cm. It shall be covered with stretched laminated plastic sheets (Formica) 0.8 mm thick. Color: Gray (3130). The table board shall be thickened by using strips of plywood (sandwich) wood 17 x 50 mm around the backside edges of the table's board. Beech wood shall be used in belting the edges of the table board 15 mm thick and 34 mm wide. The beech belt shall be fixed by using adhesives of best quality and after fixing of Formica to the board. The beech belt shall be painted with three coats of lacquer paint in addition to a prime coat and to be fixed by using adhesive materials with no nailing. The table board shall be fixed on the metal framework using galvanized metal screws. Number of screws: 10. Formica type is "MATT".</p> <p>3. Painting - All metal shall be painted after applying anticorrosive treatment with at least three stages and cleaned from oil, grease, dust, rust and other dirt using special thermal control painting for metal furniture to form a layer of base painting of (iron phosphate) (0.4 – 0.8) gm/m². - Automatic spray painting shall be applied to be followed by a drying process in a thermal furnace with suitable temperature and time for the process. - Thickness of painting (60 – 80) micron. - (Abox polyster powder) paint should be used, color: Marengo No. 7016 Painting of iron, assembly, delivery and storage must be carried out away from climatic influence i.e. sun, dust etc.</p> <p>4. Marking of goods: a. The supplier shall put his commercial mark on all supplied pieces of goods by stamp or by fixing a sticker properly –approved by the Ministry- on the bottom face of the goods, this mark shall contain the name of the factory, tender No. and the financial resource, in a clear and permanent manner and approved by Ministry.</p> <p>5. 12	<p>Working tables</p> <p><u>See illustration 12 (p: 121)</u></p>	<p>A. General H=90 cm</p> <p>B. Technical Specifications</p> <p>1. Metal framework The metal framework shall be made from square steel profile tubes 30 x 30 mm and 40 x 40 mm and 1.25 mm thick. The bottom edge of the metal frame shall be covered with plastic heels. All metal pieces are to be welded together properly, strongly and in conformity with regulations. CO2 welding shall be used. Plastic heels are to be installed under the legs to elevate the iron parts from the ground.</p> <p>2. Table board The table board shall be made of plywood "sandwich" board, best quality. Thickness of plywood is 17 mm, dimensions: 200 x 90 cm. It shall be covered with stretched laminated plastic sheet (Formica) 0.8 mm thick. Color grey. The table board shall be thickened by using strips of plywood (sandwich) wood 17 x 50 mm around the backside edges of the table's board. Beech wood shall be used in belting the edges of the table board 15 mm thick and 34 mm wide. The beech belt shall be painted with three coats of lacquer paint in addition to prime coat and to be fixed by using adhesive materials with no nailing. Fixing of the beech belt shall be done after the lamination with the plastic sheets. The table board shall be fixed on the metal framework using metal screws. Number of screws: 10. Plastic sheet type is "MATT".</p> <p>3. Painting All metal parts shall be painted after being cleaned from oil using special thermal control painting for metal furniture like electrostatic powder. Color margin: No. 7016. Automatic spray painting shall be applied to be followed by a drying process in a thermal furnace. Painting of iron, assembly, delivery and storage must be carried out away from climatic influence i.e. sun, dust etc.</p> <p>4. Marking of goods: a. The supplier shall put his commercial mark on all supplied pieces of goods by stamp or by fixing a sticker properly –approved by the Ministry- on the bottom face of the goods, this mark shall contain the supplier name, tender No. and the financial resource, in a clear and permanent manner and approved by Ministry.</p> <p>5. 15	Office Desk <u>See illustration 15 (p. 122)</u>	<p>A. General Dimensions: 150x70x75H</p> <p>B. Technical Specifications Both sides of the desk, should be made of (MDF) of best quality and with thickness of 28 mm. Top board of the desk (face) shall be made of chipboard wood with thickness of 28 mm. with circular shape, as shown on attached figure. The front board, drawers and the compartment should be made of (MDF) of best quality, thickness (17mm). All parts of the desk shall be covered with a layer of melamine. Color Beech wood . The desk shall contain a compartment unit at the left hand side and a drawer unit with three drawers at the right side. All edges should be covered by plastic belt, thickness (1.5-2mm), color black. Knobs of good quality shall be installed on the compartment and drawers in a way allows for smooth opening and closing. The side of the compartment shall be fixed with chromium plated metal hinges (Yugoslavian type) of best quality. (2 hinges) The top drawer and the compartment shall have cylindrical locks of best quality. The drawers shall slide on steel rails 1.25 mm thick with wheels to ensure smooth movement of the drawers. All parts of the desk shall be assembled by using metal angles and galvanized metal screws, special for wooden furniture. Type of locks for compartment and top drawers are from best quality approved by Ministry of Education.</p> <p>C. Marking of goods: The supplier shall put his commercial mark on all supplied pieces of goods by stamp or by fixing a sticker properly – approved by the Ministry- on the bottom face of the goods, this mark shall contain the supplier name, tender No. and the financial resource, in a clear and permanent manner and approved by Ministry.</p> <p>D. Packing: a-It should be backed unassembled using special cardboard for this type of furniture . b-The supplier shall assemble the furniture at his expenses and responsibility ,at the assigned places according to distribution table.</p>	No	44	143	6292

Keyboard Holder

Two-piece of sheet metal 1.5 mm thick shall be centrally welded to the upper frame of the table to hold the keyboard shelf.

One piece of sheet metal 1.5 mm thick and 96 cm long shall be welded at the front of the table.

In this piece, a hole 5 cm in diameter shall be made and covered with a hard plastic ring.

A shelf made of plywood with thickness of 17 mm, 57 x 40 cm covered with stretched laminating plastic sheet shall be installed to hold the keyboard.

This shelf shall be belted from front with wooden belt (U) shape. Color: black.

The shelf shall move on painted metal rails 1.25 mm thick and wheels.

3. Painting

- All metal shall be painted after applying anticorrosive treatment with at least three stages and cleaned from oil, grease, dust, rust and other dirt using special thermal control painting for metal furniture to form a layer of base painting of (iron phosphate) (0.4 – 0.8) gm/m².

- Automatic spray painting shall be applied to be followed by a drying process in a thermal furnace with suitable temperature and time for the process.

- Thickness of painting (60 – 80) micron.

- (Epoxy polyester powder) paint should be used, color: Marengo No. 7016

Painting of iron, assembly, delivery and storage must be carried out away from climatic influence i.e. sun, dust etc.

4. Marking of goods:

The supplier shall put his commercial mark on all supplied pieces of goods by stamp or by fixing a sticker properly –approved by the Ministry- on the bottom face of the goods, this mark shall contain the supplier name, tender No. and the financial resource, in a clear and permanent manner and approved by Ministry.

5. Packing:

The supplied goods shall be backed by using special plastic sheets (with air babbles) to prevent scratching of paintings and surfaces of goods .

6. Inspections and tests:

The MEHE has the right to test sample of this item at specialized labs or institutions at the Palestinian Authority area or nearby countries, at the supplier's expenses before and /or after bid award.
